Fetal genetic testing and aneuploidy diagnosis have required invasive diagnostic sampling procedures which carries a small but significant risk of miscarriage. In 1997 the presence of cell-free fetal DNA (cffDNA) in the maternal circulation was reported. Since 2011 it has been introduced into clinical practice. Fetal DNA comes mainly from the placenta. It can be detected from the first trimester of pregnancy onwards and is rapidly cleared from the maternal circulation after delivery. Maternal blood is therefore a reliable source of material for prenatal diagnosis. However, the cffDNA is mixed with a larger proportion of maternal cell-free DNA and current methodologies do not allow complete separation of fetal from maternal DNA in vitro. Hence it remains mainly a screening test with false positives and false negatives.

The protocols used in sequencing allow detection only when the fetal DNA percentage is at least 4–5%. Recently, DNA sequencing technologies have allowed very precise relative quantification of DNA fragments and so the detection of the fetal aneuploidies can now be performed in a robust manner. cff DNA screening may be offered anytime from 10 weeks on through the duration of the pregnancy and it is the only screen available in the third trimester. If NIPT indicates a chromosomal abnormality, invasive sampling by chorionic villous sampling or amniocentesis shall be offered.
Indications

1. Chromosomal abnormalities: Trisomy 21, 18, 13
2. Fetal sex determination in pregnancies at risk of sex linked diseases
3. Fetal blood grouping in Rh negative mothers

“The American Congress of Obstetricians and Gynecologists (ACOG) and International Society of Prenatal Diagnosis (ISPD), along with other professional societies, have stated that NIPT is an available screening option for all pregnant women.” [3, 4]

ACOG guidelines recommend use of NIPT in following circumstance:[3,4]

1. Maternal age ≥ 35 years,
2. Increased risk of aneuploidy on ultrasound,
3. Woman with previous pregnancy affected with trisomy,
4. Positive screening test or parental balanced translocation giving increased risk to fetal trisomy.

Methodologies[5]

1. Random multiple parallel sequencing (MPS)/ target sequencing
2. Array based methods
3. Whole genome sequencing/ Next generation sequencing (NGS)

Advantages[6]

- NIPT results are available in about 1-2 weeks which allows expectant parents more time for decision-making and potentially offers them more options.
- For trisomy 21 and 18, the detection rates in large series using different technologies have reported sensitivity and specificity close to 100%.
- No miscarriage risk
- NIPT is preferred in women for whom fetal testing is desired but invasive testing should be avoided, for example, chronic infection (HIV, hepatitis).

Possible sources of error

About 1-8% of pregnant persons will need to have their blood drawn a second time because the test fails. There are various reasons why a test may fail including technical issues with the sample, or not enough cffDNA from the pregnancy. Factors that may result in a low fetal fraction are:

1. Gestational age less than 10 weeks
2. Maternal obesity
3. Multiple pregnancy
4. Placental mosaicism
Limitations

- NIPT is not a diagnostic test. If NIPT indicates a chromosomal abnormality, invasive sampling by chorionic villous sampling or amniocentesis shall be offered. Management decisions, including termination of pregnancy should not be based on maternal plasma cffDNA results alone.

- NIPT does not screen for all possible conditions. A negative NIPT result does not guarantee a healthy baby. NIPT should be preceded by an ultrasound examination in the first trimester and followed by targeted anomaly scan around 18-20 weeks irrespective of the results.

- Due to a lack of clinical validation, cffDNA screening is not recognized for microdeletions.

- In multiple pregnancies, the scientific evidence for NIPT is still insufficient. The offer of NIPT in multiple pregnancies should therefore be made after careful consideration.

- As long as the cost for NIPT is high, it is not considered economically feasible to offer NIPT as the first screening method to all who request prenatal testing.

15th Annual Congress of Indian Fertility Society
FERTIVISION 2019 6-8 December
The Leela Ambience Hotel, Gurugram
New Delhi | India

Theme: Beyond Tomorrow

First Announcement

www.fertivision2019.com
Dear Friends, Welcome to FERTIVISION 2019

On behalf of the Indian Fertility Society (IFS), we are extremely pleased to announce and cordially invite you to the much awaited academic event – the 15th National Annual Conference - Fertivision 2019, to be held on 6th, 7th & 8th December 2019 at Hotel The Leela Ambience, Gurugram, New Delhi / NCR, India.

This conference is aimed to provide the most comprehensive academic platform in the field of Infertility and Assisted Reproductive Technology (ART)” befitting the theme of the meeting “Beyond Tomorrow”

Renowned and leading expert faculty from around the world would gather and deliver talks in our cutting edge scientific program which will not only enrich your current knowledge and clear all doubts faced in day-to-day clinical practice, but will also enlighten you about the latest innovations and ongoing research.

A large number of renowned international faculties have already confirmed their participations till date. The pre-congress workshops on 6th December are specially designed for informal in-depth training with hands on sessions on simulators and live, where ever feasible. There will be 4 simultaneous running streams on 7th & 8th December covering a wide variety of topics, enabling you to choose the deliberations specific to your area of interest and clinical practice. We are having a dedicated hall for the esteemed embryologist friends.

The best oral and poster presenters under various categories and the quiz winners will be honored with special awards and prizes. Do join us in large numbers and update your knowledge with most updated current standards in clinical practice, as well as get inspired to innovate further to overcome remaining enigmatic issues!

The three days of scientific program will encompass didactic lectures, keynote presentations, panel discussions and orations. There will be 9 Pre-conference workshops based on Ovulation Induction, Ultrasound, Andrology, Embryology, Hands on Embryo Transfer, Ovum Pickup and PGS and more. These workshops will be in addition to the special state of the art workshops by the faculty from IFFS and ESHRE. We expect delegates across India, Sri Lanka, Bangladesh, Nepal, Middle - East Countries and African Nations and the arrangements are being made to accommodate more than 2500 delegates.

The exhibition area will be one of the highlights of the conference. Exhibiting provides tremendous benefits to both participating industry and the society. Tea, coffee and lunch will be served confluent with the trade area to allow optimal interaction between the trade companies and delegates during beverage and lunch breaks.

We invite you to participate in the Fertivision 2019 and exchange your expertise with more than 2500 specialists in the field of Assisted Reproduction.

We look forward to your active participation and suggestions for successful conduct of the conference.

With Our Best Regards

Dr. M Gouri Devi
Organizing Chairperson
FERTIVISION 2019

Dr. Pankaj Talwar
Organizing Secretary
FERTIVISION 2019
Scientific Highlights

1. Fertivision 2019 Would be One of the Most Comprehensive Coverage on “Best Practices, Innovations and Progress in the Field of Infertility and ART” Being Conducted in India.

2. We Promise You Cutting Edge Academic Deliberations Delivered by Leading Renowned Expert Faculty from Around the world befitting the Theme of the Meeting “Beyond tomorrow”

3. In the Conference There Would Be 4 Simultaneous Halls Running with Legendary Faculty in Lead Interacting With You, Covering a Wide Variety of Topics, and Enabling You to Tailor the Program Especially to Your Area of Interest and Clinical Practice. We are Having a Dedicated Hall for the Esteemed Embryologist Friends.

4. Along With the Main Conference We are Having 9 Pre-Congress Workshops on 6th Dec 2019 Pertaining to the Burning Issue in ART.

5. We Welcome You and Offer You This Opportunity to Showcase Your Research Work on a Prestigious National Platform and Enhance Your CV.

6. Scientific Quiz for sharp talented young minds with primary rounds conducted by various IFS Chapters across the country and abroad

7. Several Prizes and Awards for Best Paper, Poster and Quiz winners

8. Enjoy the Evenings With Exciting Social and Cultural Program

10. A Great Opportunity for All of Us to Amalgamate the Most Updated Current Standards in Our Clinical Practice and Look Beyond Tomorrow

Choose from 10 Pre Conference Workshops | 6 December

1) IFFS Workshop on Do’s and Don’ts in Ovarian Stimulation
2) Reproductive Surgery
3) Ultrasonography Imaging In Infertility
4) Andrology & Semenology
5) Ovum Pickup and Embryo Transfer (With Simulators)
6) Cryobiology
7) Total Quality Management
8 A) Holistic Medicine and Patient Counselling
8 B) Publish or Perish
9) PGT and Genomics

Limited Seats

Looking for your Own IVF Lab setup?

**Biocell Enterprise** offers “One Stop Shop” solutions for all your needs in ART

We provide complete hand holding support to setup your very own IVF (ART) centre.

Services offered:

- Site visit & Lab design assistance
- Supply & Installation of high end IUI-IVF-ICSI equipment
- Supply of Labware & Consumables
- Supply of entire range of IVF media
- IVF Lab Quality Control services
- Clinical and Embryology Support
- Trainings
- AMC & After Sales Support
